---

## Education

---

SUNY Polytechnic: B.S. Computer Science, expected December 2026: GPA 3.6

## Experience

---

### Software Engineer Intern, ANDRO Computational Solutions (2026, May → December)

- Worked on waveform/RF C++ and CMake codebases for defense contractors
- Implemented automated utilities via CI/CD pipelines with Python, Bash and Docker
  - ◆ Reduced an hour-long manual build to a one-click, 15-minute automated pipeline
  - ◆ Wrote and automated hundreds of regression tests into one click
  - ◆ Automated documentation generation and other developer utilities
- Hunted and patched bugs from compilation, edge cases, and oversights
- Developed several new features onto existing codebases
- Wrote user guides and technical design documents

### Information Technologies Intern, Westlake High School (2023, April → June)

- Repaired and installed systems such as laptops, desktops and printers
- Repaired damaged laptops and salvaged those unrevivable

### Hobbyist Computer Programmer (2019 → Present)

- Learned concepts and several languages out of pure interest

## Skills

- 
- Proficiency in languages: C, C++, Rust, Python, Bash, Java, Javascript (+ HTML and CSS)
  - Experience with tools: Linux, CMake, Docker, Vulkan, CI/CD

## Projects

- 
- [Cutl](#); A Vulkan-powered graphics engine written in C with a thin C++ wrapper
    - ◆ Main passion/hobby project
    - ◆ Simple creation, usage and cleaning of Vulkan context and tools
  - [joeysode.dev](http://joeysode.dev); My personal website
    - ◆ WebGPU rendered background
  - Various small projects, some visible on [my Github](#)
